

## Beginning C++ Programming C-Style Strings

The slide at about 6:35 in this video has 2 errors.

```
cout << strlen(str); // 10
```

should be:

```
cout << strlen(str); // 11
```

and

```
strcmp(str, "Another"); // -1
```

should be:

```
strcmp(str, "Another") // evaluates to an integer > 0
```

Thanks to Karim for pointing that out.
